

## 2013–2022 Index to Feature Articles IEEE Electrification Magazine Vols. 1–10

This index covers all feature articles that appeared in IEEE Electrification Magazine during 2013–2022. The Author Index contains the primary entry for each article, listed under the first author's name. The primary entry includes the coauthors' names, the title of the article, and its location, specified by the publication abbreviation, year, month, and inclusive pagination. The Subject Index contains entries describing the article under all appropriate subject headings, plus the first author's name, the publication abbreviation, month, and year, and inclusive pages. Note that the article title is found only under the primary entry in the Author Index. (Index entries have been compiled from the 2013 through 2022 year-end indexes.)

Each index entry contains a link (blue text) to allow you to view the article's abstract in IEEE Xplore®.

### AUTHOR INDEX

## SUBJECT INDEX

## A

- AC motors
- Fault Scenarios in DC Ship Grids: The advantages and disadvantages of modular multilevel converters. *Staudt, V., +, MELEC June 2015 40-48*
  - Propulsion Powertrain Simulator: Future Turboelectric distributed-propulsion aircraft. *Choi, B., MELEC Dec. 2014 23-34*
- Accidents
- Transportation Electrification and Managing Traffic Congestion: The Role of Intelligent Transportation Systems. *Boucher, M., MELEC Sept. 2019 16-22*
- Actuators
- The More Electric Aircraft: Technology and Challenges. *Wheeler, P., +, MELEC Dec. 2014 6-12*
- Adaptive systems
- Research Tools for Smart Electric Vehicle Charging: An introduction to the adaptive charging network research portal. *Lee, Z., +, MELEC Sept. 2021 29-36*
- Aerodynamics
- Evacuated-Tube, High-Speed, Autonomous Maglev (Hyperloop) Transport System for Long-Distance Travel: An overview. *Lluesma, F., +, MELEC Dec. 2021 67-73*
  - Hydrogen Fuel Cells for Ship Electric Propulsion: Moving Toward Greener Ships. *Shakeri, N., +, MELEC June 2020 27-43*
- Aerospace control
- Actuation Challenges in the More Electric Aircraft: **Overcoming Hurdles in the Electrification of Actuation Systems.** *Nagel, N., MELEC Dec. 2017 38-45*
  - Toward Integrated Digital Aircraft Control Systems: For **Electrified System Optimized Size, Cost and Efficiency.** *Beik, O., +, MELEC Dec. 2017 46-52*
- Aerospace electronics
- Actuation Challenges in the More Electric Aircraft: **Overcoming Hurdles in the Electrification of Actuation Systems.** *Nagel, N., MELEC Dec. 2017 38-45*
  - Hydrogen-Electric Aircraft Technologies and Integration: Enabling an environmentally sustainable aviation future. *Ansell, P.J., MELEC June 2022 6-16*

- Magnetic Saturation and Flux-Weakening Control: Using Lookup Tables Based on a Static Method of Identification for Nonlinear Permanent-Magnet Synchronous Motors. *Mansouri, B., +, MELEC Dec. 2017 53-61*
- Power Electronics: A critical enabler of future hydrogen-electric systems for aviation. *Wang, F.F., +, MELEC June 2022 57-68*
- The More Electric Aircraft: Technology and Challenges. *Wheeler, P., +, MELEC Dec. 2014 6-12*
- Toward Integrated Digital Aircraft Control Systems: For Electrified System Optimized Size, Cost and Efficiency. *Beik, O., +, MELEC Dec. 2017 46-52*
- Toward Robust Stability of Aircraft Electrical Power Systems: Using a  $\mu$ -Based Structural Singular Value to Analyze and Ensure Network Stability. *Sumsurooah, S., +, MELEC Dec. 2017 62-71*
- Africa
- A Microgrid Test Bed in Singapore: An Electrification Project for Affordable Access to Electricity with Optimal Asset Management.** *Jiang, T., +, MELEC June 2017 74-82*
- Scalable Solar dc Microgrids: On the Path to Revolutionizing the Electrification Architecture of Developing Communities. *Nasir, M., +, MELEC Dec. 2018 63-72*
- Standalone Integrated Power Electronics Systems: Applications for Off-Grid Rural Locations. *Schumacher, D., +, MELEC Dec. 2018 73-82*
- Aggregates
- Advanced Metering Infrastructure for Distribution Planning and Operation: Closing the loop on grid-edge visibility. *McKenna, K., +, MELEC Dec. 2022 58-65*
- Air pollution
- Battery-Powered Ships: A Class Society Perspective. *Alnes, O., +, MELEC Sept. 2017 10-21*
- Electric Drives for Electric Green Taxiing Systems: Examining and Evaluating the Electric Drive System. *Ganev, E., MELEC Dec. 2017 10-24*
- The Missing Health Link: How a Transition to Electrified Vehicles May Benefit More Than Just the Environment. *Kowal, S., +, MELEC Sept. 2019 76-80*
- Air quality
- The Future Is Present in California: Delivering on the Promise of Fuel Cell-Powered Transportation. *Martinez, A., MELEC March 2018 37-47*
- Air transportation
- Hydrogen Electric Airplanes: A disruptive technological path to clean up the aviation sector. *Noland, J.K., MELEC March 2021 92-102*
- Aircraft
- Energy Storage for Electrified Aircraft: The Need for Better Batteries, Fuel Cells, and Supercapacitors.** *Misra, A., MELEC Sept. 2018 54-61*
- Power Conversion Technologies for Automotive and Aircraft Systems: Applying Electric/Hybrid Vehicle Technology to More Electric Aircraft Systems. *Rajashékara, K., MELEC June 2014 50-60*
- Aircraft manufacture
- Hydrogen Electric Airplanes: A disruptive technological path to clean up the aviation sector. *Noland, J.K., MELEC March 2021 92-102*
- Toward Integrated Digital Aircraft Control Systems: For Electrified System Optimized Size, Cost and Efficiency. *Beik, O., +, MELEC Dec. 2017 46-52*
- Aircraft propulsion
- Actuation Challenges in the More Electric Aircraft: **Overcoming Hurdles in the Electrification of Actuation Systems.** *Nagel, N., MELEC Dec. 2017 38-45*
- Energy Storage for Electrified Aircraft: The Need for Better Batteries, Fuel Cells, and Supercapacitors.** *Misra, A., MELEC Sept. 2018 54-61*
- Flying Cars: Challenges and Propulsion Strategies. *Rajashékara, K., +, MELEC March 2016 46-57*
- Hydrogen-Electric Aircraft Technologies and Integration: Enabling an environmentally sustainable aviation future. *Ansell, P.J., MELEC June 2022 6-16*
- Hydrogen-Powered Aircraft: Hydrogen-electric hybrid propulsion for aviation. *Gao, Y., +, MELEC June 2022 17-26*
- Induction Machine for More Electric Aircraft: Enabling New Electrical Power System Architecture of More Electric Aircraft. *Jia, Y., +, MELEC Dec. 2017 25-37*
- Power Conversion Technologies for Automotive and Aircraft Systems: Applying Electric/Hybrid Vehicle Technology to More Electric Aircraft Systems. *Rajashékara, K., MELEC June 2014 50-60*
- Power for Aircraft Emergencies: A Hybrid Proton Exchange Membrane H<sub>2</sub>/O<sub>2</sub> Fuel Cell and Ultracapacitor System. *Turpin, C., +, MELEC Dec. 2017 72-85*
- Propulsion Powertrain Simulator: Future Turboelectric distributed-propulsion aircraft. *Choi, B., MELEC Dec. 2014 23-34*
- The More Electric Aircraft: Technology and Challenges. *Wheeler, P., +, MELEC Dec. 2014 6-12*
- Toward Integrated Digital Aircraft Control Systems: For Electrified System Optimized Size, Cost and Efficiency. *Beik, O., +, MELEC Dec. 2017 46-52*
- Airplanes
- Hydrogen-Powered Aircraft: Hydrogen-electric hybrid propulsion for aviation. *Gao, Y., +, MELEC June 2022 17-26*
- The More Electric Aircraft: Technology and Challenges. *Wheeler, P., +, MELEC Dec. 2014 6-12*
- Analytical models
- AC Microgrid Small-Signal Modeling: Hierarchical Control Structure Challenges and Solutions. *Wu, Y., +, MELEC Dec. 2019 81-88*
- Improving Peak Power in Electrified Vehicles: The Development of a Hierarchical Design Optimization Method. *Wang, Y., +, MELEC June 2014 25-30*
- The 48-V Mild Hybrid: Benefits, Motivation, and the Future Outlook. *Hayslett, S., +, MELEC June 2020 11-17*
- Transient Simulations With a Large Penetration of Converter-Interfaced Generation: Scientific Computing Challenges And Opportunities. *Henriquez-Auba, R., +, MELEC June 2021 72-82*
- Turning Data into Knowledge: Big data analytics with behind-the-meter distributed energy resources in the digital utility. *Castro, A.d., +, MELEC Dec. 2022 50-57*
- Anodes
- Enhancing the Fast Charging Capability of High-Energy-Density Lithium-Ion Batteries: A Pack Design Perspective. *Chen, C., +, MELEC Sept. 2020 62-69*

## Grain boundaries

Grain-Boundary-Diffused Magnets: The Challenges in Obtaining Reliable and Representative BH Curves for Electromagnetic Motor Design. *Thompson, M., +, MELEC March 2017 19-27*

## Graphical user interfaces

Sailing into the Future: Industrial Internet of Things at Sea with X-Connect. *Rodskar, E., +, MELEC Sept. 2017 33-39*

## Graphite

Enhancing the Fast Charging Capability of High-Energy-Density Lithium-Ion Batteries: A Pack Design Perspective. *Chen, C., +, MELEC Sept. 2020 62-69*

Lithium Has Transformed Vehicle Technology: How Trends in Li-Ion Battery Technology Have Developed for **Vehicle Electrification**. *Alamgir, M., MELEC March 2017 43-52*

## Green buildings

Transforming a National Historic Landmark Into a Green Nanogrid: The Case of Crown Hall. *Shahidehpour, M., +, MELEC Dec. 2020 20-35*

## Green products

A Strategy to Decarbonize Civil Aviation: A phased innovation approach to hydrogen technologies. *Huete, J., +, MELEC June 2022 27-33*

Electric Drives for Electric Green Taxiing Systems: Examining and Evaluating the Electric Drive System. *Ganev, E., MELEC Dec. 2017 10-24*

Government Policies Help Promote Clean Transportation in India: Proton-Exchange Membrane Fuel Cells for Vehicles. *Reddy, B., +, MELEC March 2018 26-36*

Hydrogen Electric Airplanes: A disruptive technological path to clean up the aviation sector. *Noland, J.K., MELEC March 2021 92-102*

Load Control: A new era of intelligent automation. *Lu, N., MELEC Sept. 2021 18-28*

Remote Off-Grid Solutions for Greenland and Denmark: Using Smart-Grid Technologies to Ensure Secure, Reliable Energy for Island Power Systems. *Wu, Q., +, MELEC June 2017 64-73*

Riding the Rails to DC Power Efficiency: Energy efficiency in dc-electrified metropolitan railways. *Pecharroman, R., +, MELEC Sept. 2014 32-38*

## Greenhouse effect

Hydrogen-Electric Aircraft Technologies and Integration: Enabling an environmentally sustainable aviation future. *Ansell, P.J., MELEC June 2022 6-16*

Toward Extreme Fast Charging: Challenges and Opportunities in Directly Connecting to Medium-Voltage Line. *Srdic, S., +, MELEC March 2019 22-31*

Will Electric Vehicles Drive Distribution Grid Upgrades?: The Case of California. *Coignard, J., +, MELEC June 2019 46-56*

## Grounding

Implementing an Electric Utility Microgrid: Lessons Learned. *Vukojevic, A., +, MELEC March 2020 24-36*

Managing the Italian High-Speed Railway Network: Provisions for Reducing Interference Between Electric Traction Systems. *Caracciolo, F., +, MELEC Sept. 2016 42-47*

## H

## Hardware

A Quantum Leap in Microgrids Security: The Prospects of Quantum-Secure Microgrids. *Tang, Z., +, MELEC March 2021 66-73*

Enabling Secure Peer-to-Peer Energy Transactions Through Dynamic Watermarking in Electric Distribution Grids: Defending the distribution system against sophisticated cyberattacks with a provable guarantee. *Huang, T., +, MELEC Sept. 2021 55-64*

Research Tools for Smart Electric Vehicle Charging: An introduction to the adaptive charging network research portal. *Lee, Z., +, MELEC Sept. 2021 29-36*

Stabilizing Inverter-Based Transmission Systems: Power hardware-in-the-loop experiments with a megawatt-scale grid-forming inverter. *Hoke, A., +, MELEC Sept. 2022 32-44*

## Harmonic analysis

Impact of GLCs on Power Transformers: Overheating is not the real issue. *Girgis, R., +, MELEC Dec. 2015 8-12*

Mitigating Geomagnetic Disturbances: A summary of Dominion Virginia Power's efforts. *Sun, R., +, MELEC Dec. 2015 34-45*

Open Challenges in Future Electric Ship Design: High-Frequency Disturbance Propagation in Integrated Power and Energy Systems on Ships. *Colavitto, A., +, MELEC Dec. 2019 98-110*

## Hazards

Grid-Scale Energy Storage Systems: Ensuring safety. *Chalamala, B.R., +, MELEC Dec. 2021 19-28*

## Heat pumps

Flexibility in Sustainable Electricity Systems: Multivector and Multisector Nexus Perspectives. *Martinez Cesena, Eduardo Alejandro, +, MELEC June 2019 12-21*

High Penetration of Electric Vehicles Could Change The Residential Power System: Public dc Fast Chargers Will Not Be Enough. *Ginart, A., +, MELEC June 2021 34-42*

## Heat recovery

All-Climate Battery Technology for Electric Vehicles: Inching Closer to the Mainstream Adoption of Automated Driving. *Yang, X., +, MELEC March 2019 12-21*

## Heating

Real-Time Management of Geomagnetic Disturbances: Hydro One's eXtreme Space Weather control room tools. *Marti, L., +, MELEC Dec. 2015 46-51*

## HEMTs

Power Gallium Nitride Technology: The Need for Efficient Power Conversion. *Chowdhury, D., MELEC June 2020 6-10*

## Heuristic algorithms

Behind-the-Meter Resources: Data-driven modeling, monitoring, and control. *Yu, N., +, MELEC Dec. 2022 20-28*

## High-speed rail transportation

Evacuated-Tube, High-Speed, Autonomous Maglev (Hyperloop) Transport System for Long-Distance Travel: An overview. *Lluesma, F., +, MELEC Dec. 2021 67-73*

## High-temperature superconductors

Cryogenic Power Conversion Systems: The next step in the evolution of power electronics technology. *Rajashekara, K., +, MELEC Dec. 2013 64-73*

Evolving Toward a Scalable Hyperloop Technology: Vacuum transport as a clean alternative to short-haul flights. *Noland, J.K., MELEC Dec. 2021 55-66*

## History

Advanced Metering Infrastructure for Distribution Planning and Operation: Closing the loop on grid-edge visibility. *McKenna, K., +, MELEC Dec. 2022 58-65*

Load Control: A new era of intelligent automation. *Lu, N., MELEC Sept. 2021 18-28*

## Logic gates

DC Microgrid Protection: Using the Coupled-Inductor Solid-State Circuit Breaker. *Maqsood, A., +, MELEC June 2016 58-64*

Power Gallium Nitride Technology: The Need for Efficient Power Conversion. *Chowdhury, D., MELEC June 2020 6-10*

Wide-Bandgap Semiconductor Technology: Its impact on the electrification of the transportation industry. *Shamsi, P., +, MELEC Dec. 2013 59-63*

## Logistics

Toward Ground Vehicle Electrification in the U.S. Army: An Overview of Recent Activities. *Masrur, M., MELEC March 2016 33-45*

## Loss measurement

Inertia Monitoring on Renewable Energy Grids: Quantifying modern grid stability challenges for systems with high inverter-based resource penetration using new digital technology. *Enas, A., +, MELEC Sept. 2022 55-64*

## Low carbon economy

Singapore's Sustainable Energy Story: Low-carbon energy deployment strategies and challenges. *Chin, C.S., +, MELEC Dec. 2022 84-89*

## Low frequency noise

Low-Frequency Coupling: Phenomena in Electric Transportation Systems. *Bongiorno, J., +, MELEC Sept. 2016 15-22*

## Low pass filters

Power for Aircraft Emergencies: A Hybrid Proton Exchange Membrane H<sub>2</sub>/O<sub>2</sub> Fuel Cell and Ultracapacitor System. *Turpin, C., +, MELEC Dec. 2017 72-85*

## Low voltage

Cloud-Based Energy Storage Systems: A shared pool of benefits in distributed electric power systems. *Golshannavaz, S., +, MELEC June 2022 82-91*

## Low-carbon economy

A New Hybridization Approach for Increasing the Share of Renewables in El Hierro: Approaching a substantial milestone on decarbonization. *Boda, F., +, MELEC Sept. 2022 20-31*

A Strategy to Decarbonize Civil Aviation: A phased innovation approach to hydrogen technologies. *Huete, J., +, MELEC June 2022 27-33*

Building Energy Systems as Behind-the-Meter Resources for Grid Services: Intelligent load control and transactive control and coordination. *Katipamula, S., +, MELEC Dec. 2022 38-49*

Emerging Best Practices for Modeling Energy Storage in Integrated Resource Plans: An overview and a comparison. *Twitchell, J.B., +, MELEC Dec. 2021 38-46*

Operational Security in 100% Inverter-Based Power Systems: Experiences from Hawai'i. *Muenz, U., +, MELEC Sept. 2022 10-19*

## M

## Machine learning

Wide-Area Control of Power Systems: Employing Data-Driven, Hierarchical Reinforcement Learning. *Chakraborty, A., MELEC March 2021 45-52*

## Magnetic analysis

Grain-Boundary-Diffused Magnets: The Challenges in Obtaining Reliable and Representative BH Curves for Electromagnetic Motor Design. *Thompson, M., +, MELEC March 2017 19-27*

## Magnetic anisotropy

Getting Rare-Earth Magnets Out of EV Traction Machines: A Review of the Many Approaches Being Pursued to Minimize or Eliminate Rare-Earth Magnets from Future EV Drivetrains. *Jahns, T., MELEC March 2017 6-18*

## Magnetic fields

Low-Frequency Coupling: Phenomena in Electric Transportation Systems. *Bongiorno, J., +, MELEC Sept. 2016 15-22*

## Magnetic flux

Getting Rare-Earth Magnets Out of EV Traction Machines: A Review of the Many Approaches Being Pursued to Minimize or Eliminate Rare-Earth Magnets from Future EV Drivetrains. *Jahns, T., MELEC March 2017 6-18*

Grain-Boundary-Diffused Magnets: The Challenges in Obtaining Reliable and Representative BH Curves for Electromagnetic Motor Design. *Thompson, M., +, MELEC March 2017 19-27*

Magnetic Saturation and Flux-Weakening Control: Using Lookup Tables Based on a Static Method of Identification for Nonlinear Permanent-Magnet Synchronous Motors. *Mansouri, B., +, MELEC Dec. 2017 53-61*

Toward a Sustainable More Electrified Future: The Role of Electrical Machines and Drives. *EL-Refaie, A.M., MELEC March 2019 49-59*

## Magnetic multilayers

Toward a Sustainable More Electrified Future: The Role of Electrical Machines and Drives. *EL-Refaie, A.M., MELEC March 2019 49-59*

## Magnetic resonance imaging

Getting Rare-Earth Magnets Out of EV Traction Machines: A Review of the Many Approaches Being Pursued to Minimize or Eliminate Rare-Earth Magnets from Future EV Drivetrains. *Jahns, T., MELEC March 2017 6-18*

## Magnetic shielding

An Electric Roadway System Leveraging Dynamic Capacitive Wireless Charging: Furthering the Continuous Charging of Electric Vehicles. *Zhang, H., +, MELEC June 2020 52-60*

## Maintenance engineering

**Empowering Smart Communities: Electrification, Education, and Sustainable Entrepreneurship in IEEE Smart Village Initiatives.** *Anderson, A., +, MELEC June 2017 6-16*

## Management

Real-Time Management of Geomagnetic Disturbances: Hydro One's eXtreme Space Weather control room tools. *Marti, L., +, MELEC Dec. 2015 46-51*

## Marine power systems

Shipboard Solid-State Protection: Overview and Applications. *Schmerda, R., +, MELEC Sept. 2013 32-39*

## Marine technology

Battery-Powered Ships: A Class Society Perspective. *Aines, O., +, MELEC Sept. 2017 10-21*

## Marine vehicles

A Naval Integrated Power System with a Battery Energy Storage System: Fuel efficiency, reliability, and quality of power. *Kim, S., +, MELEC June 2015 22-33*

Advancing New Technologies in Electrical Ships: IEEE standards are the risk mitigation tool. *Khersonsky, Y., MELEC June 2015 34-39*

Battery-Powered Ships: A Class Society Perspective. *Aines, O., +, MELEC Sept. 2017 10-21*

Customizable Battery Power System for Marine and Offshore Applications: Trends, Configurations, and Challenges. *Chin, C., +, MELEC Dec. 2019 46-55*

### Safety

CHEETA: An All-Electric Aircraft Takes Cryogenics and Superconductivity on Board: Combatting climate change. *Stautner, W., +, MELEC June 2022 34-42*

Electric Propulsors for Zero-Emission Aircraft: Partially superconducting machines. *Sirimanna, S., +, MELEC June 2022 43-56*

Electrification and Automation in Maritime Applications: Employing AI Techniques for Energy Optimization and Efficiency. *Bellone, M., +, MELEC Dec. 2019 22-31*

Grid-Scale Energy Storage Systems: Ensuring safety. *Chalamala, B.R., +, MELEC Dec. 2021 19-28*

Load Control: A new era of intelligent automation. *Lu, N., MELEC Sept. 2021 18-28*

Low-Frequency Coupling: Phenomena in Electric Transportation Systems. *Bongiorno, J., +, MELEC Sept. 2016 15-22*

The Codes and Standards Facilitating the Design and Adoption of Energy Storage for Power System Applications: Keeping pace with evolving safety codes and standards. *McDowall, J., +, MELEC Dec. 2021 29-37*

### Satellite communication

Space Microgrids: New Concepts on Electric Power Systems for Satellites. *Lashab, A., +, MELEC Dec. 2020 8-19*

### Saturation magnetization

Magnetic Saturation and Flux-Weakening Control: Using Lookup Tables Based on a Static Method of **Identification for Nonlinear Permanent-Magnet** Synchronous Motors. *Mansouri, B., +, MELEC Dec. 2017 53-61*

### Schedules

Behind the Meter Strategies: Energy management system with a Swedish case study. *Shafique, H., +, MELEC Sept. 2021 112-119*

### Scheduling

Learning-Enabled Residential Demand Response: Automation and Security of Cyberphysical Demand Response Systems. *Mieth, R., +, MELEC March 2021 36-44*

### Scientific computing

Transient Simulations With a Large Penetration of Converter-Interfaced Generation: Scientific Computing Challenges And Opportunities. *Henriquez-Auba, R., +, MELEC June 2021 72-82*

### Sea measurements

Energy Savings in Coastal Fisheries: Use of a Serial Battery Hybrid Power System. *Aarsaether, K., MELEC Sept. 2017 74-79*

Zero-Emission Autonomous Ferries for Urban Water Transport: Cheaper, Cleaner Alternative to Bridges and Manned Vessels. *Reddy, N., +, MELEC Dec. 2019 32-45*

### Secondary cells

Cutting the Cord: Static and Dynamic Inductive Wireless Charging of Electric Vehicles. *Lukic, S., +, MELEC Sept. 2013 57-64*

### Security

Energy Storage: Improving system reliability, deferring network upgrading, taking advantage of markets, and beyond. *Wu, X., +, MELEC Sept. 2021 104-111*

Grid-Edge Blockchain-Based Transactive Energy Platform: Design and implementation. *Rahimi, F., +, MELEC Sept. 2021 46-54*

Operational Security in 100% Inverter-Based Power Systems: Experiences **from Hawai'i**. *Muenz, U., +, MELEC Sept. 2022 10-19*

Unmanned Aerial Vehicles in Modern Power Systems: Technologies, Use Cases, Outlooks, and Challenges. *Aminifar, F., +, MELEC Dec. 2020 107-116*

### Semiconductor devices

Power Electronics: A critical enabler of future hydrogen-electric systems for aviation. *Wang, F.F., +, MELEC June 2022 57-68*

### Sensitivity

A Comparison of Three Strategies: Electric vehicles battery cooling strategies and use of nanomaterial for performance enhancement. *Kumar, P., +, MELEC Dec. 2022 77-83*

### Sensitivity analysis

The Dependence on Mechanical Design in Railway Electrification: Focusing on the ac Perspective. *Jimenez-Octavio, J., +, MELEC Sept. 2013 4-10*

### Sensor fusion

Cloud-Based Energy Storage Systems: A shared pool of benefits in distributed electric power systems. *Golshannavaz, S., +, MELEC June 2022 82-91*

### Sensor systems

Mining Smart Meter Data to Enhance Distribution Grid Observability for Behind-the-Meter Load Control: Significantly improving system situational awareness and providing valuable insights. *Yuan, Y., +, MELEC Sept. 2021 92-103*

### Sensor systems and applications

IoT-Enabled Humans in the Loop for Energy Management Systems: Promoting Building Occupants' Participation in Optimizing Energy Consumption. *Bisadi, M., +, MELEC June 2018 64-72*

### Sensors

Efficient Waste Transportation and Recycling: Enabling Technologies for Smart Cities Using the Internet of Things. *Mahmood, I., +, MELEC Sept. 2019 33-43*

Energy Metering of Trains: The European Experience. *Van der Spiegel, B., +, MELEC Sept. 2020 70-78*

Grid Edge Visibility: Gaps and a road map. *Zhang, Y.Y., +, MELEC Dec. 2022 10-19*

Planning the Second Generation of Smart Cities: Technology to Handle the Pressures of Urbanization. *Dadon, I., MELEC Sept. 2019 6-15*

### Shafts

Frequency Fluctuations in Marine Microgrids: Origins and Identification Tools. *Tarasiuk, T., +, MELEC Sept. 2020 40-46*

### Ships

New Horizons in DC Shipboard Power Systems: New fault protection strategies are essential to the adoption of dc power systems. *Cairolì, P., +, MELEC Dec. 2013 38-45*

- Shipboard Solid-State Protection: Overview and Applications. *Schmerda, R., +, MELEC Sept. 2013 32-39*

- System-on-chip
- Modeling and Dynamic Behavior of Battery Energy Storage: A Simple Model for Large-Scale Time-Domain Stability Studies. *Pourbeik, P., +, MELEC Sept. 2015 47-51*
- Transportation Electrification: Conductive charging of electrified vehicles. *Wang, H., +, MELEC Dec. 2013 46-58*

## Systematics

Mining Smart Meter Data to Enhance Distribution Grid Observability for Behind-the-Meter Load Control: Significantly improving system situational awareness and providing valuable insights. *Yuan, Y., +, MELEC Sept. 2021 92-103*

## Systems engineering and theory

An Enterprise Systems Engineering Approach to **Electrification: Looking at the Bigger Picture Through Life-Cycle Analysis of Community Microgrids: A Case Study in Papua New Guinea.** *Anderson, A., +, MELEC Dec. 2018 18-31*

## Systems modeling

Renewable Energy on the Apple Isle: Managing a high penetration of inverter-based energy resources in Tasmania. *Halley, A., +, MELEC Sept. 2022 71-82*

## Systems operation

A Grid-Edge-Inspired and Community-Oriented Control Framework: Utility perspective on centralized and decentralized control. *Zheng, H., +, MELEC Dec. 2022 66-76*

Learning-Enabled Residential Demand Response: Automation and Security of Cyberphysical Demand Response Systems. *Mieth, R., +, MELEC March 2021 36-44*

Pathways to the Next-Generation Power System With Inverter-Based Resources: Challenges and recommendations. *Lin, Y., +, MELEC March 2022 10-21*

## T

## Target recognition

Enabling Cryogenic Hydrogen-Based CO<sub>2</sub>-Free Air Transport: Meeting the demands of zero carbon aviation. *Sethi, V., +, MELEC June 2022 69-81*

## Technological innovation

Transforming a National Historic Landmark Into a Green Nanogrid: The Case of Crown Hall. *Shahidehpour, M., +, MELEC Dec. 2020 20-35*

## Telecommunication services

Advanced LVDC Electrical Power Architectures and Microgrids: A step toward a new generation of power distribution networks. *Dragicevic, T., +, MELEC March 2014 54-65*

## Telecommunications

Voltage-Level Selection of Future Two-Level LVdc Distribution Grids: A Compromise Between Grid Compatibility, Safety, and Efficiency. *Rodriguez-Diaz, E., +, MELEC June 2016 20-28*

## Temperature

Cryogenic Power Conversion Systems: The next step in the evolution of power electronics technology. *Rajashekara, K., +, MELEC Dec. 2013 64-73*

## Temperature control

Cryogenic Power Conversion Systems: The next step in the evolution of power electronics technology. *Rajashekara, K., +, MELEC Dec. 2013 64-73*

## Temperature dependence

Cryogenic Power Conversion Systems: The next step in the evolution of power electronics technology. *Rajashekara, K., +, MELEC Dec. 2013 64-73*

## Temperature distribution

A Comparison of Three Strategies: Electric vehicles battery cooling strategies and use of nanomaterial for performance enhancement. *Kumar, P., +, MELEC Dec. 2022 77-83*

All-Climate Battery Technology for Electric Vehicles: Inching Closer to the Mainstream Adoption of

Automated Driving. *Yang, X., +, MELEC March 2019 12-21*

Customizable Battery Power System for Marine and Offshore Applications: Trends, Configurations, and Challenges. *Chin, C., +, MELEC Dec. 2019 46-55*

## Temperature measurement

A Comparison of Three Strategies: Electric vehicles battery cooling strategies and use of nanomaterial for performance enhancement. *Kumar, P., +, MELEC Dec. 2022 77-83*

An Electric Roadway System Leveraging Dynamic Capacitive Wireless Charging: Furthering the Continuous Charging of Electric Vehicles. *Zhang, H., +, MELEC June 2020 52-60*

Real-Time Management of Geomagnetic Disturbances: Hydro One's eXtreme Space Weather control room tools. *Marti, L., +, MELEC Dec. 2015 46-51*

## Temperature sensors

A Comparison of Three Strategies: Electric vehicles battery cooling strategies and use of nanomaterial for performance enhancement. *Kumar, P., +, MELEC Dec. 2022 77-83*

## Thermal loading

The Proliferation of Solar Photovoltaics: Their Impact on Widespread Deployment of Electric Vehicles. *Aminifar, F., +, MELEC Sept. 2020 79-91*

## Thermal management

Electric Propulsors for Zero-Emission Aircraft: Partially superconducting machines. *Sirimanna, S., +, MELEC June 2022 43-56*

## Thermal resistance

Gaining Traction: Thermal Management and Reliability of Automotive Electric Traction-Drive Systems. *Moreno, G., +, MELEC June 2014 42-49*

## Three-dimensional displays

Electric Vehicle Research in Indonesia: A Road Map, Road Tests, and Research Challenges. *Asfani, D., +, MELEC June 2020 44-51*

## Thyristors

Shipboard Solid-State Protection: Overview and Applications. *Schmerda, R., +, MELEC Sept. 2013 32-39*

## Time factors

Simulation of 100% Inverter-Based Resource Grids With Positive Sequence Modeling. *Ramasubramanian, D., +, MELEC June 2021 62-71*

## Time measurement

Simulation of 100% Inverter-Based Resource Grids With Positive Sequence Modeling. *Ramasubramanian, D., +, MELEC June 2021 62-71*

## Time-domain analysis

Electrified Airplanes: A Path to Zero-Emission Air Travel. *Ansell, P., +, MELEC June 2020 18-26*

## Time-frequency analysis

The Role of Voltage Controls in Modern All-Electric Ships: Toward the all electric ship. *Vicenzutti, A., +, MELEC June 2015 49-65*

## Timing

A Grid-Edge-Inspired and Community-Oriented Control Framework: Utility perspective on centralized and decentralized control. *Zheng, H., +, MELEC Dec. 2022 66-76*

## Topology

A Closer Look at the On-Board Charger: The Development of the Second-Generation Module for the Chevrolet Volt. *Cesiel, D., +, MELEC March 2017 36-42*

Toward a Sustainable More Electrified Future: The Role of Electrical Machines and Drives. *EL-Refaie, A.M., MELEC March 2019 49-59*

- A Naval Integrated Power System with a Battery Energy Storage System: Fuel efficiency, reliability, and quality of power. Kim, S., +, [MELEC June 2015 22-33](#)
- Naval Power Systems: Integrated power systems for the continuity of the electrical power supply. Doerry, N., [MELEC June 2015 12-21](#)
- Toward Ground Vehicle Electrification in the U.S. Army: An Overview of Recent Activities. Masrur, M., [MELEC March 2016 33-45](#)
- US Department of Energy
- Building Resilient Integrated Grids: One neighborhood at a time. Bahramirad, S., +, [MELEC March 2015 48-55](#)
- Evaluating Transactive Systems: Historical and Current DOE Research and Development Activities. Hammerstrom, D., +, [MELEC Dec. 2016 30-36](#)
- V
- Vacuum systems
- Evolving Toward a Scalable Hyperloop Technology: Vacuum transport as a clean alternative to short-haul flights. Noland, J.K., [MELEC Dec. 2021 55-66](#)
- Variable speed drives
- Shipboard Solid-State Protection: Overview and Applications. Schmerda, R., +, [MELEC Sept. 2013 32-39](#)
- Vehicle dynamics
- Dynamic Wireless Charging of Autonomous Vehicles: Small-Scale Demonstration of Inductive Power Transfer as an Enabling Technology for Self-Sufficient Energy Supply. Guidi, G., +, [MELEC March 2020 37-48](#)
- Hydrogen Fuel Cells for Ship Electric Propulsion: Moving Toward Greener Ships. Shakeri, N., +, [MELEC June 2020 27-43](#)

## Vehicle safety

Traffic Management and Energy Optimization for High-Speed Trains: An Overview of Methods for Saving Energy. *Liu, J.*, +, [MELEC Sept. 2019 66-75](#)

Transportation Electrification and Managing Traffic Congestion: The Role of Intelligent Transportation Systems. *Boucher, M.*, [MELEC Sept. 2019 16-22](#)

## Vehicles

Propulsion System Design of a Battery Electric Vehicle: The Chevrolet Spark EV. *Rahman, K.*, +, [MELEC June 2014 14-24](#)

## Vehicle-to-grid

Integrating Electric Vehicles with Energy Storage and Grids: New Technology and Specific Capabilities Spur Numerous Applications. *Chandler, S.*, +, [MELEC Sept. 2018 38-43](#)

Potential Benefits of Vehicle-to-Grid Technology in California: High Value for Capabilities Beyond One-Way Managed Charging. *Donadee, J.*, +, [MELEC June 2019 40-45](#)

## Vehicular ad hoc networks

Toward Smart Vehicular dc Networks in the Automotive Industry: Process, Computational Tools, and Trends in the Design and Simulation of Vehicle Electrical Distribution Systems. *Dominguez, X.*, +, [MELEC March 2020 61-68](#)

## Velocity measurement

Simulation of 100% Inverter-Based Resource Grids With Positive Sequence Modeling. *Ramasubramanian, D.*, +, [MELEC June 2021 62-71](#)

## Voltage control

Future of Electric Railways: Advanced Electrification Systems with Static Converters for ac Railways. *Krastev, I.*, +, [MELEC Sept. 2016 6-14](#)

Geomagnetic Disturbance: A comprehensive approach by American Electric Power to address the impacts. *Qiu, Q.*, +, [MELEC Dec. 2015 22-33](#)

Induction Machine for More Electric Aircraft: Enabling New Electrical Power System Architecture of More Electric Aircraft. *Jia, Y.*, +, [MELEC Dec. 2017 25-37](#)

Integration of Shipboard Microgrids Within Land Distribution Networks: Employing a Ship Microgrid to Meet Critical Needs. *D'Agostino, F.*, +, [MELEC Dec. 2019 69-80](#)

Magnetic Saturation and Flux-Weakening Control: Using Lookup Tables Based on a Static Method of Identification for Nonlinear Permanent-Magnet Synchronous Motors. *Mansouri, B.*, +, [MELEC Dec. 2017 53-61](#)

Microgrid Field Trials in Sweden: Expanding the Electric Infrastructure in the Village of Simris. *Wilms, H.*, +, [MELEC Dec. 2018 48-62](#)

Microgrid Operation and Control: Challenges and expected functionalities. *Ilic, M.*, [MELEC Sept. 2021 65-74](#)

Networked Microgrid Operations: Supporting a Resilient Electric Power Infrastructure. *Schneider, K.*, +, [MELEC Dec. 2020 70-79](#)

Power for Aircraft Emergencies: A Hybrid Proton Exchange Membrane H<sub>2</sub>/O<sub>2</sub> Fuel Cell and Ultracapacitor System. *Turpin, C.*, +, [MELEC Dec. 2017 72-85](#)

Power-Quality Improvement in AC Railway Substations: The concept of chopper-controlled impedance. *Ladoux, P.*, +, [MELEC Sept. 2014 6-15](#)

Solar Generation, Storage, and Electric Vehicles in Power Grids: Challenges and Solutions with Coordinated Control at the Residential Level. *Hafiz, F.*, +, [MELEC Dec. 2018 83-90](#)

The Proliferation of Solar Photovoltaics: Their Impact on Widespread Deployment of Electric Vehicles. *Aminifar, F.*, +, [MELEC Sept. 2020 79-91](#)

The Role of Voltage Controls in Modern All-Electric Ships: Toward the all electric ship. *Vicenzutti, A.*, +, [MELEC June 2015 49-65](#)

Transportation Electrification: Conductive charging of electrified vehicles. *Wang, H.*, +, [MELEC Dec. 2013 46-58](#)

Utility-Scale Shared Energy Storage: Business models for utility-scale shared energy storage systems and customer participation. *Ben-Idris, M.*, +, [MELEC Dec. 2021 47-54](#)

Voltage-Level Selection of Future Two-Level LVdc Distribution Grids: A Compromise Between Grid Compatibility, Safety, and Efficiency. *Rodriguez-Diaz, E.*, +, [MELEC June 2016 20-28](#)

Wide-Area Control of Power Systems: Employing Data-Driven, Hierarchical Reinforcement Learning. *Chakraborty, A.*, [MELEC March 2021 45-52](#)

Will Electric Vehicles Drive Distribution Grid Upgrades?: The Case of California. *Coignard, J.*, +, [MELEC June 2019 46-56](#)

## Voltage fluctuations

Grid Support Benefits of Solar PV Systems as STATCOM (PV-STATCOM) Through Converter Control: Grid Integration Challenges of Solar PV Power Systems. *Varma, R.*, +, [MELEC June 2021 50-61](#)

Utility-Scale Shared Energy Storage: Business models for utility-scale shared energy storage systems and customer participation. *Ben-Idris, M.*, +, [MELEC Dec. 2021 47-54](#)

## Voltage measurement

Advanced Metering Infrastructure for Distribution Planning and Operation: Closing the loop on grid-edge visibility. *McKenna, K.*, +, [MELEC Dec. 2022 58-65](#)

Modeling and Analysis of GMD Effects on Power Systems: An overview of the impact on large-scale power systems. *Shetye, K.*, +, [MELEC Dec. 2015 13-21](#)

Networked Microgrid Operations: Supporting a Resilient Electric Power Infrastructure. *Schneider, K.*, +, [MELEC Dec. 2020 70-79](#)

Synchrophasors Point the Way: The Emergence of a New Technology. *Martin, K.*, [MELEC March 2021 10-24](#)

What the IEC Tells Us About Stray Currents: Guidance for a Practical Approach. *Pires, C.*, [MELEC Sept. 2016 23-29](#)

## W

### Waste management

Efficient Waste Transportation and Recycling: Enabling Technologies for Smart Cities Using the Internet of Things. *Mahmood, I.*, +, [MELEC Sept. 2019 33-43](#)

### Wastewater

Unmanned Aerial Vehicles in Modern Power Systems: Technologies, Use Cases, Outlooks, and Challenges. *Aminifar, F.*, +, [MELEC Dec. 2020 107-116](#)

### Water heating

Blockchain for Peer-to-Peer Transactive Energy Trading in Networked Microgrids: Providing an Effective and Decentralized Strategy. *Shahidehpour, M.*, +, [MELEC Dec. 2020 80-90](#)

Energy Storage: Balancing the 21st Century Power Grid. *Boston, T.*, +, [MELEC Sept. 2015 52-57](#)

Transactive Home Energy Management Systems: The Impact of Their Proliferation on the Electric Grid. *Pratt, A.*, +, [MELEC Dec. 2016 8-14](#)

## Water resources

Energy Storage: Balancing the 21st Century Power Grid. *Boston, T.*, +, [MELEC Sept. 2015 52-57](#)

Flexibility in Sustainable Electricity Systems: Multivector and Multisector Nexus Perspectives. *Martinez Cesena, Eduardo Alejandro*, +, [MELEC June 2019 12-21](#)

## Watermarking

Enabling Secure Peer-to-Peer Energy Transactions Through Dynamic Watermarking in Electric Distribution Grids: Defending the distribution system against sophisticated cyberattacks with a provable guarantee. *Huang, T.*, +, [MELEC Sept. 2021 55-64](#)

## Weapons

Pulsed-Power Load Monitoring for an All-Electric Ship: Utilizing the Fourier Transform Data-Driven Deep Learning Approach. *Ma, Y.*, +, [MELEC March 2021 25-35](#)

## Weather forecasting

Coordinating Electricity and Transportation Networks: Enhancing Power Grid Resilience Strategies Against Ice Storms. *Yan, M.*, +, [MELEC Sept. 2019 23-32](#)

Grid Edge Visibility: Gaps and a road map. *Zhang, Y.Y.*, +, [MELEC Dec. 2022 10-19](#)

## Wheels

Flying Cars: Challenges and Propulsion Strategies. *Rajashékara, K.*, +, [MELEC March 2016 46-57](#)

## Wind energy

Grid-Forming Wind: Getting ready for prime time, with or without inverters. *Gevorgian, V.*, +, [MELEC March 2022 52-64](#)

## Wind energy generation

Energy Storage, Renewable Power Generation, and the Grid: NREL Capabilities Help to Develop and Test Energy-Storage Technologies. *Ma, Z.*, +, [MELEC Sept. 2015 30-40](#)

Grid-Forming Wind: Getting ready for prime time, with or without inverters. *Gevorgian, V.*, +, [MELEC March 2022 52-64](#)

Island Power Systems With High Levels of Inverter-Based Resources: Stability and Reliability Challenges. *Hoke, A.*, +, [MELEC March 2021 74-91](#)

Multi-Energy Microgrids: Designing, operation under new business models, and engineering practices in China. *Wang, Z.*, +, [MELEC Sept. 2021 75-82](#)

Pathways to the Next-Generation Power System With Inverter-Based Resources: Challenges and recommendations. *Lin, Y.*, +, [MELEC March 2022 10-21](#)

Renewable Energy Integration in Canadian Remote Community Microgrids: The Feasibility of Hydrogen and Gas Generation. *Vera, E.*, +, [MELEC Dec. 2020 36-45](#)

The Evolution of Railway Power Supply Systems Toward Smart Microgrids: The Concept of the Energy Hub and Integration of Distributed Energy Resources. *Brenna, M.*, +, [MELEC March 2020 12-23](#)

## Wind farms

The Kythnos Microgrid: A 20-Year History. *Hatziaargyriou, N.*, +, [MELEC Dec. 2020 46-54](#)

## Wind forecasting

Impedance Methods for Analyzing Stability Impacts of Inverter-Based Resources: Stability Analysis Tools for Modern Power Systems. *Shah, S.*, +, [MELEC March 2021 53-65](#)

## Wind power generation

Advanced Control Solutions for Operating Isolated Power Systems: Examining the Portuguese islands. *Vasconcelos, H.*, +, [MELEC March 2015 25-35](#)

Behind the Meter Strategies: Energy management system with a Swedish case study. *Shafique, H.*, +, [MELEC Sept. 2021 112-119](#)

Community Power and Fleet Microgrids: Meeting climate goals, enhancing system resilience, and stimulating local economic development. *Roach, M.*, [MELEC March 2014 40-53](#)

Enabling Secure Peer-to-Peer Energy Transactions Through Dynamic Watermarking in Electric Distribution Grids: Defending the distribution system against sophisticated cyberattacks with a provable guarantee. *Huang, T.*, +, [MELEC Sept. 2021 55-64](#)

Energy Storage as a Peaker Replacement: Can Solar and Battery Energy Storage Replace the Capacity Value of Thermal Generation? *Stenclik, D.*, +, [MELEC Sept. 2018 20-26](#)

Energy Storage, Renewable Power Generation, and the Grid: NREL Capabilities Help to Develop and Test Energy-Storage Technologies. *Ma, Z.*, +, [MELEC Sept. 2015 30-40](#)

GIC in Future Large-Scale Power Grids: An analysis of the problem. *Liu, L.*, +, [MELEC Dec. 2015 52-59](#)

Grid Support Benefits of Solar PV Systems as STATCOM (PV-STATCOM) Through Converter Control: Grid Integration Challenges of Solar PV Power Systems. *Varma, R.*, +, [MELEC June 2021 50-61](#)

Grid-Forming Wind: Getting ready for prime time, with or without inverters. *Gevorgian, V.*, +, [MELEC March 2022 52-64](#)

**Hydrogen Production via Water Electrolysis: The Benefits of a Solar Cell-Powered Process.** *Chang, W.*, +, [MELEC March 2018 19-25](#)

Impedance Methods for Analyzing Stability Impacts of Inverter-Based Resources: Stability Analysis Tools for Modern Power Systems. *Shah, S.*, +, [MELEC March 2021 53-65](#)

Island Power Systems With High Levels of Inverter-Based Resources: Stability and Reliability Challenges. *Hoke, A.*, +, [MELEC March 2021 74-91](#)

Multi-Energy Microgrids: Designing, operation under new business models, and engineering practices in China. *Wang, Z.*, +, [MELEC Sept. 2021 75-82](#)

Operational Security in 100% Inverter-Based Power Systems: Experiences from Hawai'i. *Muenz, U.*, +, [MELEC Sept. 2022 10-19](#)

Pathways to the Next-Generation Power System With Inverter-Based Resources: Challenges and recommendations. *Lin, Y.*, +, [MELEC March 2022 10-21](#)

Remote Off-Grid Solutions for Greenland and Denmark: Using Smart-Grid Technologies to Ensure Secure, Reliable Energy for Island Power Systems. *Wu, Q.*, +, [MELEC June 2017 64-73](#)

Renewable Energy on the Apple Isle: Managing a high penetration of inverter-based energy resources in Tasmania. *Halley, A.*, +, [MELEC Sept. 2022 71-82](#)

Rural Electrification Goes Local: Recent innovations in renewable generation, energy efficiency, and grid modernization. *Yuan, G.*, [MELEC March 2015 16-24](#)

Solar Energy, dc Distribution, and Microgrids: Ensuring Quality Power in Rural India. *Jhunjunwala, A.*, +, [MELEC Dec. 2018 32-39](#)

Testing Large-Scale Energy-Storage Systems: Novel Safety Evaluations Can Be Run in a Spacious, New Indoor Chamber Available in Japan. *Kubo, H.*, +, [MELEC Sept. 2018 62-69](#)

Toward a Global Green Smart Microgrid: An Industrial Park in China. *Qu, M.*, +, [MELEC Dec. 2020 55-69](#)

Ubiquitous Power Electronics in Future Power Systems: Recommendations to Fully Utilize Fast Control Capabilities. *Huang, Z.*, +, [MELEC Sept. 2020 18-27](#)

#### Wind turbines

Locally Manufactured Small Wind Turbines: Empowering communities for sustainable rural electrification. *Latoufis, K.*, +, [MELEC March 2015 68-78](#)

Remote Off-Grid Solutions for Greenland and Denmark: Using Smart-Grid Technologies to Ensure Secure, Reliable Energy for Island Power Systems. *Wu, Q.*, +, [MELEC June 2017 64-73](#)

The Island Hydrogen Project: Electrolytic Generated Hydrogen for Automotive and Maritime Applications. *Nistor, S.*, +, [MELEC March 2018 55-60](#)

The Kythnos Microgrid: A 20-Year History. *Hatziargyriou, N.*, +, [MELEC Dec. 2020 46-54](#)

#### Wireless communication

Unmanned Aerial Vehicles in Modern Power Systems: Technologies, Use Cases, Outlooks, and Challenges. *Aminifar, F.*, +, [MELEC Dec. 2020 107-116](#)

Wireless Charging for Ships: High-Power Inductive Charging for Battery Electric and Plug-In Hybrid Vessels. *Guidi, G.*, +, [MELEC Sept. 2017 22-32](#)

#### Wireless power transfer

Dynamic Wireless Charging of Autonomous Vehicles: Small-Scale Demonstration of Inductive Power Transfer as an Enabling Technology for Self-Sufficient Energy Supply. *Guidi, G.*, +, [MELEC March 2020 37-48](#)

#### Wireless sensor networks

Unmanned Aerial Vehicles in Modern Power Systems: Technologies, Use Cases, Outlooks, and Challenges. *Aminifar, F.*, +, [MELEC Dec. 2020 107-116](#)

#### Wiring

Power Up with 800-V Systems: The Benefits of Upgrading Voltage Power for Battery-Electric Passenger Vehicles. *Jung, C.*, [MELEC March 2017 53-58](#)

Toward Smart Vehicular dc Networks in the Automotive Industry: Process, Computational Tools, and Trends in the Design and Simulation of Vehicle Electrical Distribution Systems. *Dominguez, X.*, +, [MELEC March 2020 61-68](#)

#### Writing

Transient Simulations With a Large Penetration of Converter-Interfaced Generation: Scientific Computing Challenges And Opportunities. *Henriquez-Auba, R.*, +, [MELEC June 2021 72-82](#)

Y

#### Yttrium barium copper oxide

An Electric Roadway System Leveraging Dynamic Capacitive Wireless Charging: Furthering the Continuous Charging of Electric Vehicles. *Zhang, H.*, +, [MELEC June 2020 52-60](#)
