

Engineers are driving climate change solutions

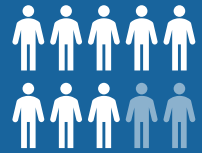

Every day, engineers are leading the way to build a greener and more environmentally sustainable energy future.

According to a nationwide survey, the public trusts engineers to develop climate change solutions more than any other profession.

Engineers who develop and utilize clean energy technologies

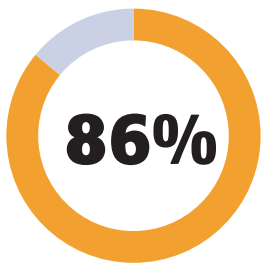

Survey Question: Which of the following groups do you trust most to determine and implement solutions to fight climate change and achieve a clean energy future?

8 out of 10 people believe that failing to address climate change poses a threat for future generations

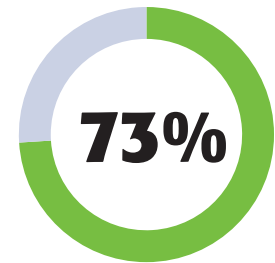

Climate change and extreme weather are top environmental concerns nationwide. A majority are optimistic that technology is the key to addressing our climate future.

Believe engineers play an important role in **environmental protection**

Agree that engineers are **leaders in the fight** against climate change

Feel confident that engineers can **develop solutions** to help address climate change
